

ART 34 AND

10

Claims (amended)

1. An electronic device (1) comprising:
- a frame part (3);
 - 5 - a PCB (printed circuit board) (4) provided with electronic components, said PCB (4) being connected to said frame part (3);
 - a vibrator (9) electrically connected to said PCB (4), said vibrator (9) being fixed in relation to said frame part (3) by means of an elastic fitting (11;111;211);
 - 10 - an exchangeable outer cover (2;102;202) releaseably connected to said frame part (3), said exchangeable outer cover (2;102;202) abutting on said elastic fitting (11;111;211) when said exchangeable outer cover (2;102;202) is mounted on said electronic device (1); and
 - 15 - a protective shell element (5) connected to the frame part (3), said protective shell element (5) being positioned between said PCB (4) and said exchangeable outer cover (2;102;202), the vibrator (9) being mounted on said protective shell element (5)
- 20 **characterised in** that the vibrator (9) is mounted on a side of the shell element (5) that faces the PCB (4); and that an access opening (14) is provided in the shell element (5) through which the exchangeable outer cover (2;102;202) abuts on the elastic fitting (11;111;211).
2. An electronic device according to claim 1, **characterised in** that the elastic fitting (11;211) is provided with a protruding fitting part (16) that
- 25 protrudes through the access opening (14).
3. An electronic device according to claim 1, **characterised in** that the exchangeable outer cover (102) is provided with a protruding cover part (116) that protrudes through the access opening (14).
- 30
4. An electronic device according to any one of claims 1-3, **characterised in** that the vibrator (9) comprises a housing (12); and that the elastic fitting (11;111;211) surrounds at least a major part of the housing (12).
- 35
5. An electronic device according to any one of claims 1-4, **characterised in** that the elastic fitting comprises a rubber grommet (11;111).

ART 34 AMET

11

6. An electronic device according to any one of claims 1-4, **characterised in** that the elastic fitting comprises a flexible metal holder (211).

5 7. An electronic device according to any one of claims 1-6, **characterised in** that the electronic device (1) is a mobile radio station, such as a mobile telephone.

10 8. An electronic device according to claim 7, **characterised in** that the exchangeable outer cover (2;102;202) is a front cover; and that the frame part (3) is a back cover.
